

New: the classical Islamic library API is now public — hundreds of classical books across 11 genres, full PDFs from R2 + AI semantic search. No signup.

≡ Audio > GET /v1/audio/surah — Full surah audio

Audio

GET /v1/audio/surah — Full surah audio

Get the MP3 audio for an entire surah by reciter. Returns a 302 redirect to the CDN URL.

Returns a **302 redirect** to a full-surah MP3 file on `cdn.islamic.app`. Surah-level audio is a single continuous recording of an entire chapter, rather than the per-ayah format.

- ⓘ Not every reciter has surah-level audio. Check the `audioLevels` array on each entry from [/v1/audio/reciters](#) — a reciter supports this endpoint only if `"surah"` appears in its `audioLevels`. Requests for reciters without surah audio return `404`.

Endpoint

GET `https://api.islamic.app/v1/audio/surah/:reciter/:number`

Path parameters

reciter string required

Reciter identifier. See [reciters](#) — only reciters whose `audioLevels` includes `"surah"` support this endpoint.

number number required

Surah number, 1 to 114.

curl
javascript
HTML

islamic.app

```
curl -L https://api.islamic.app/v1/audio/surah/ar.alafasy/1 -o surah1.mp3
```

Redirect behavior

HTTP/1.1 302 Found
 Location: https://cdn.islamic.app/quran/audio-surah/ar.alafasy/1.mp3
 Cache-Control: public, max-age=604800
 Access-Control-Allow-Origin: *

Errors

Code	Reason
400	Surah number out of range (must be 1–114)
404	Surah audio does not exist for that reciter

```
{
  "code": 404,
  "status": "Not Found",
  "data": "Surah audio not found for ar.husary surah 1"
}
```
